

*Looking for a boost for your skin that won't break your wallet?*

**SIGNATURE SERIES (Normal Price \$299.**

**March Madness Price \$199.)**

**Step ONE: Photofacial (IPL) or Acne Light Treatment**

**Step TWO: La Maison Signature Peel**

What does this treatment do?

**Step ONE:** Using the Palomar System, a specialized hand piece filters light from different parts of the spectrum. Each band of the spectrum has a wavelength that is ideal for different treatments, such as sunspot removal and vessel clearance. The light is absorbed by the pigment in sunspots and the blood in visible vessels, and converted to heat. Sunspots darken after the treatment and naturally shed. Skin tone will be more normal, with less pronounced redness as vessels sometimes darken first and then disappear. Typically several treatments will be necessary to achieve complete clearance of sunspots and rosacea. We follow Step ONE with the La Maison Signature Peel at the same treatment.

**Step TWO:** Our specially formulated Signature Peel is a Chemical Peel with the benefits of TCA, salicylic acid and Retin-A. It delivers a moderate peel appropriate for most skins and is clinically proven to reduce visible signs of aging. It is invaluable to acne-prone skin. TCA is an ingredient that dermatologists use to treat pre-cancerous lesion on the skin. Salicylic Acid cleans out the pores and is widely used in the treatment of acne prone skin. Retin-A, according to the Mayo Clinic's report on anti-aging, is the safest product to use long-term. Retin-A is used as an acne treatment and an anti-aging product. The Signature Peel will burn and/or tingle for a few minutes when applied. During the peeling process, which lasts from 3 to 7 days, most people experience tightness, peeling, redness, but the results outweigh any discomfort. Check with your skin care provider to see if the Signature Series is right for your skin!

*Botox® Cosmetic \$9. a unit*

*There's only one BOTOX® Cosmetic*
